

OZ Tableware are committed to new product developments in chafing fuel to ensure that you have the best available products to meet your needs.

# OZ HEAT LIQUID CHAFING FUEL

## The Original and The Best Since 1994

### RECYCLED CANS

The high quality tin plate used to manufacture our cans is made from recycled material

### CANS CAN BE RECYCLED

The cans can be recycled as long as the wick inside has been removed.

### RECYCLED PACKAGING

Our cartons are all made from Recycled Material and can be recycled as long as they are also put out for recycling.

### VISIBLE FLAME

Flame burns with a blue/red tint making it easily visible preventing accidents.

### NON FLAMMABLE

OZ HEAT's fuel formulation using Diethylene Glycol means that the product is non flammable making OZ HEAT the safest food heating fuel alternative.

### NON SPILL & NON DRIP

OZ HEAT's design has a special fuel holding reservoir. Should the container be turned side on or knocked over, the fuel is caught in the reservoir avoiding any spillage.

### RESEALABLE & EASY TO OPEN

OZ HEAT has a plastic plug with a convenient lever that is easy to open and re-seal making it easier and more efficient than screw caps.

### ECONOMICAL 100% FUEL USAGE

OZ HEAT's efficient wick design can be re-lit and used time and time again giving you 100% fuel usage preventing wastage and giving you value for money.

### CONTAINER STAYS COOL

When alight, the container does not become too hot to touch. Thus avoiding accidents, burn injuries and time loss due to injury.

### DOES NOT EVAPORATE

If left uncapped, OZ HEAT Buffet Fuel will not evaporate like alcohol based fuels.

### ODOURLESS

The fuel used is 100% odourless meaning that there are no toxic smells competing with the aroma of your food.

### NO STORAGE OR TRANSPORT RESTRICTIONS

Unlike flammable gel and alcohol based fuels which must be stored in a special 'Dangerous Goods' area, OZ HEAT Buffet Fuel is a non-hazardous food heating fuel allowing it to be stored in any location cutting down your insurance premium and freight costs.
